Riham Tarabay

Beirut, Lebanon | +961 81 045 588 | rihamtarabay.rt@gmail.com | LinkedIn | GitHub

Professional Profile

Full-Stack Engineer with experience building and maintaining customer-facing web applications across React/Next.js frontends and Node.js/NestJS/.NET backend services. Experienced with REST APIs, database-oriented application design, QA collaboration, security fundamentals, Docker, GitHub Actions CI/CD, and AWS. Fluent in Arabic, English, and French. Also develops AI/RAG systems and technical documentation, bringing structured evaluation and responsible data-handling practices to web-platform delivery.

Core Skills

Web and backend: TypeScript, JavaScript, React, Next.js, Node.js, NestJS, .NET, Express, REST APIs, responsive web development
Data and search: SQL, PostgreSQL/pgvector, Prisma, relational data modeling, semantic/hybrid search, filtering
Delivery and quality: Docker, GitHub Actions CI/CD, Git, JIRA, Confluence, Agile Scrum/Kanban, manual testing, defect triage, test documentation
Security and cloud: AWS EC2, S3, Route 53, CloudFront; vulnerability assessment, security-log analysis, access-control design
AI engineering: OpenAI-style APIs, Anthropic APIs, RAG, embeddings, vector databases, prompt/tool design, LLM evaluation, n8n automation
Languages: Arabic (native), English (fluent), French (fluent)

Professional Experience

Full-Stack Engineer — WaveMark (Cardinal Health) | Aug 2023 – Apr 2026

- Built and maintained customer-facing web applications across the full stack using React and Next.js on the frontend and Node.js, NestJS, and .NET services on the backend.
- Developed REST APIs and integrations supporting data exchange between internal systems and customer workflows.
- Collaborated with product and QA teams in Agile sprint cycles to ship features, triage bugs, and improve system stability before customer deployment.

QA Analyst Intern — WaveMark (Cardinal Health) | May 2023 – Jul 2023

- Executed manual tests to validate software functionality and system stability before customer deployment.
- Tracked defects in JIRA and collaborated with development teams on resolution.
- Authored test documentation and participated in Agile sprint cycles.

AI Consultant & Trainer — Dot Lebanon | Jan 2026

- Delivered AI consulting and technical training through the AI for Social Impact program, covering practical and responsible AI applications for social-impact projects.

Freelance Computer Science & AI Tutor — Self-employed | Feb 2024 – May 2026

- Tutored university students in computer science, data analytics, and AI, translating complex concepts into clear, structured explanations.

Cybersecurity Intern — Code Alpha, India (Remote) | May 2023 – Aug 2023

- Conducted vulnerability assessments to identify potential system weaknesses.
- Monitored system integrity through security-log analysis and implemented security protocols.

Selected Projects

Women Experts Roster — Bilingual Directory Platform (new portfolio project; implementation in progress)

- Designing and implementing a bilingual English/Arabic searchable directory with expert registration, reviewer approval, public approved-only profiles, category/location/language filters, responsive UI, and an administrative workflow.
- Using Next.js/React/TypeScript, NestJS/TypeScript, PostgreSQL/Prisma, Docker, and GitHub Actions; documenting the architecture, security model, testing plan, observability, deployment, and staff handover.
- **Status:** Portfolio application with synthetic data; not an LLWB system and not used by real customers.

SupportCopilot AI — AI Customer Support & Knowledge Assistant

- Architected a TypeScript monorepo using Next.js, NestJS, PostgreSQL/pgvector, Prisma, and OpenAI APIs with document ingestion, chunking, embeddings, semantic retrieval, grounded responses, and citations.
- Designed SSE streaming events, tool calling with schema validation and authorization checks, an LLM evaluation framework, observability fields, and GitHub Actions quality gates.

LLM Evaluation & RAG Platforms

- Developed a FastAPI golden-set evaluation service with deterministic scoring, automated tests, Docker packaging, and CI pipelines; built a Telegram RAG chatbot with conversation history and Docker deployment.

Education

Master in Artificial Intelligence — Université Saint-Joseph, Beirut | Aug 2026 – Present
B.A.Sc. in Computer Science, Minor in Data Analytics — Lebanese American University, Beirut | Sep 2022 – Dec 2025

Certifications and Training

AWS Certified Solutions Architect – Associate (2026)
AWS Certified AI Practitioner – Foundational (2026)
AI Engineering Major — Youbee AI (2025)
AI Automation Expert Program — completed (2025)
DevOps Engineer Bootcamp — Forward Mena & Simplilearn (2024)
